ULTRASOUND (imaging) SCREENINGS

***IMT - Intima/Media Thickness** (Measuring the carotid intima-media thickness (IMT) has been shown to add a "powerful piece of supplemental information" in assessing a patient's CV / heart attack risk . A 2-page computer generated report will be provided.)

Carotid (STROKE) Arteries (These arteries are checked for "fatty or calcified" plaque.)

Uterus and Ovaries (Imaged for fibroids, cysts, enlargement, etc.)

Liver (Check the liver for cysts, hemangiomas, masses, etc.)

Gall Bladder (Gallbladder is checked for gallstones, sludge, etc.)

Pancreas (Pancreas is imaged for abnormalities, pancreatitis, etc.)

Spleen (Checked for calcifications, enlargement, cysts, etc.)

Thyroid (Check the thyroid for nodules, calcifications, cysts, etc.)

Aortic (RUPTURE) Artery (Checking for aneurysm and plaque.)

Kidneys (Checked for stones, hydronephrosis, enlargement, cysts, etc.)

When you bring in a friend and you both get a "Full Pkg" each one is only \$295

NON-IMAGING ULTRASOUND

Osteoporosis - bone loss (Ultrasound machine is used to check for bone loss)

ABI - Ankle-Brachial Index (Ankle & arm blood pressures are compared to detect blocked leg arteries.)

LAB SCREENINGS

Full Panel Cholesterol / Glucose (Total cholesterol, HDL, LDL, triglycerides, etc.)

Liver Function - ALT (Screening liver for basic function)

EKG -12-lead electrocardiogram (To detect arrhythmia's, past heart attacks, etc.)

All of the health screenings will be performed by friendly, informative professionals, the results are CONFIDENTIAL, and will be given to you the SAME DAY. Take advantage of these life-saving, preventive health screenings that would cost over \$5,000 if done in a hospital.
