

New Features Coming to CRMLS Discover

On May 2nd from 10 PM to 6 AM, the CRMLS Discover Platform will be temporarily offline to deploy the following new features and updates.

Mobile Discover

All users will now be able to access a new version of CRMLS Discover Platform designed specifically for mobile devices. To access Mobile Discover, click the link for your MLS:

- <http://m.discovermls.com/cop>
- <http://m.discovermls.com/cv>
- <http://m.discovermls.com/lc>

User Password Change

All users will now be able to change their own password. To change your password, click on your name at the top-right of the CRMLS Discover Platform and select **Change Password**.

Map Pin Pop-ups

When viewing the search criteria or search results map, hover your mouse over a map pin to display a pop-up window with the listing's address, photos, and other information. You can also double-click the map pin to open the full Listing Detail page.

Auto Prospecting Updates

Auto Prospecting now allows you to add a custom message to your auto emails and select how often the system sends email notifications to your clients.

Current List View

The Print Current List View feature has been improved for better readability and printing.

For a complete list of features and updates, refer to the Information and Alerts panel on the CRMLS Discover Platform's splash page.

Note: You may experience a one-time startup delay as your system downloads the latest updates for the CRMLS Discover Platform.
