

# SAFEMLS for eKey Now Available for BlackBerry

SAFEMLS for eKEY is now available for the BlackBerry Pear, BlackBerry Curve, BlackBerry Flip, BlackBerry Storm, BlackBerry Bold and BlackBerry 8800 Series smartphones. BlackBerry users can now join the thousands of real estate professionals already enjoying the timesaving benefits of eKey services on their Palm and Windows smartphones.

There are two levels of eKey service for Blackberry. Both levels receive real-time showing notifications and both can be deactivated or reactivated instantly.

## With SAFEMLS the “key” choice is yours!

SAFEMLS offers a broad range of authentication device options, including an inventive technology created in cooperation with GE Security. Users of Supra DisplayKEY, ActiveKEY and eKEY electronic lockbox products can receive their one-time-passwords on their Supra Device, Blackberry or Palm handheld device.

The SAFEMLS - enabled Supra devices present agents with an extremely easy-to-use solution that reduces the number of devices they need to carry to conduct daily business.

## Why SAFEMLS?

- **Secure** - One-time-password paired with the user’s unique pin number is strong authentication
- **Easy to Use** - DisplayKEY and eKEY user registration is a snap.
- **Consolidated** - Single device for agent access to MLS and electronic lockbox access.
