

Smart Fax: The Ultimate Fax Solution

Are you are ready to simplify your processes but don't want to sacrifice the level of service you provide to your clients? Then, Smart Fax is the right solution for you! All you need is a fax machine to begin storing and sharing your documents online.

With Smart Fax, each member has a unique coversheet with a toll free number. The coversheet can be faxed or emailed with any document and may be reused multiple times. The system also provides an email address and personal Inbox within Smart Trac. The Inbox functions as an online file cabinet and provides the perfect place to securely file and store documents.

You will appreciate how Smart Fax's user-friendly features enable improved client communication and accelerated transactions. Clients will welcome the flexibility that Smart Fax provides when they are able to receive important paper documents digitally. Best of all, you'll enjoy saving money on courier, overnight and mail costs!

We will be conducting a webinar on **Tuesday, August 4th at 9:30 am** to demonstrate Smart Fax and answer any questions you may have about the product. This informative session will run approximately 45 minutes to 1 hour.

To register for the webinar [click here](#) or go to <https://www2.gotomeeting.com/register/699589107>.
